

Certification

Environmental Testing Laboratory (ETL) has been in business for 30 years as an independent test laboratory. We are an independent product testing and product analysis company for a broad range of products, including for military and commercial equipment.

Our laboratory is equipped with a full range of climatic and dynamic capabilities for Military, Aerospace and commercial applications. We are A2LA Accredited for Mechanical Testing and have a broad range of testing and evaluation capabilities, including FMVSS testing. Environmental Testing Laboratory has been approved by many government agencies, and a local government DCASR representative monitors all government testing at our facility.

The IC Bus Model CE school bus from year model 1999 to 2010 as modified by Bus-Air continues to meet FMVSS 220 and FMVSS 221 standards.
